

Maximize ROI & Drive More Spend Through NETSUITE ERP

PunchOut2Go.com

ORACLE®
NETSUITE

- Accelerate and streamline supplier enablement
- Decrease internal resource support
- PunchOut compatibility and order automation with any vendor
- Managed vendor integrations

MAKING
**PUNCHOUT &
B2B COMMERCE
INTEGRATIONS
EASY**

PunchOut2Go for NetSuite ERP provides PunchOut authentication of the user from NetSuite ERP into the vendor's eCommerce application in order to view the correct product offering at contracted prices. The return of the shopping cart data is transferred back into NetSuite ERP for the creation of an electronic purchase order and provides the ability to send digitally enhanced electronic purchase orders to your vendors. In addition to the platform technology, PunchOut2Go provides a support team to manage integrations with vendors on your behalf, to ensure that your requirements are met, and the integration is completed successfully.

Built for
**ORACLE®
NETSUITE**

Integrated SuiteApp
